Summary

ETQ Reliance Developer with **4+ years** of experience in designing, developing, and supporting Quality Management System (QMS) solutions. Experienced in ETQ Workflows, ETQScript, RESTful APIs, Python, SQL/MySQL, SAP integration, and Power BI. Successfully delivered ETQ solutions for 30+ global clients across Life Sciences, Pharmaceuticals, Manufacturing, Food & Beverage, Healthcare, Logistics, Consumer Goods, and Medical Devices while collaborating with cross-functional teams to deliver scalable, compliant, and high-quality solutions.

Accomplishments

- Delivered ETQ Reliance solutions for **30+ global clients** across Life Sciences, Pharmaceuticals, Manufacturing, Food & Beverage, Healthcare, Logistics, Consumer Goods, and Medical Devices.
- Successfully led ETQ application enhancements, production deployments, and system upgrades across Development, QA, UAT, and Production environments.

Professional Experience

Owens and Minor India PVT LTD

ETQ Configurator

01/2025 – Present | Remote (India)

- Extensive experience in **ETQ Reliance** modules, including **Workflows, Forms, Views, ETQScript, Connection Profiles, Database Sources, User Security, Notifications, Reports, Dashboards, System Requests, and System Administration**.
- Designed, developed, configured, tested, and deployed ETQ Reliance applications based on business and regulatory requirements.
- Configured and maintained Quality Management System (QMS) solutions to ensure compliance with industry standards and organisational quality processes.
- Gathered, analysed, and translated business requirements into scalable ETQ Reliance solutions while collaborating with business users, quality teams, and technical stakeholders.
- Developed and maintained complex ETQ workflows, business rules, forms, validations, notifications, reports, and dashboards to streamline quality management processes.
- Developed advanced **ETQScript** and **Python** scripts within the ETQ Reliance environment to automate business processes, validations, notifications, and system integrations.
- Configured and managed **Connection Profiles, Database Sources, Lookup Tables, Security Groups, User Roles, and Permissions** based on business requirements.
- Hands-on experience with **RESTful API integrations**, enabling seamless communication between ETQ Reliance and enterprise applications.
- Integrated ETQ Reliance with external systems, including **SAP** and other third-party applications, to automate business processes and improve data consistency.
- Designed, developed, and optimised complex **SQL** and **MySQL** queries, stored procedures, and database objects for reporting, troubleshooting, data validation, and performance optimisation.
- Participated in ETQ-SAP integration activities involving supplier, material, quality, and manufacturing-related business processes.
- Collaborated with Business Intelligence teams to support **Power BI** dashboard development by extracting, validating, and analysing ETQ data using SQL queries.
- Assisted in creating interactive Power BI dashboards, KPI reports, trend analysis, and executive-level reporting for business stakeholders.
- Performed end-to-end system analysis, technical design, development, configuration, testing, implementation, deployment, and production support activities.

- Developed REST API integrations, ETQ workflows, Python automation, and SQL-based solutions to improve business processes and operational efficiency.
- Collaborated with global stakeholders and cross-functional teams to deliver scalable, compliant, and high-quality ETQ solutions within project timelines.

Technical Skills

- Workflow Development
- Forms & Modules Configuration
- Views & Dashboards
- ETQScript
- Connection Profiles
- Database Sources
- User Security & Role Management
- Notifications & Email Templates
- System Administration
- Cross-functional collaboration
- RESTful API Integrations
- Python Scripting
- SQL and MySQL Queries
- Database Query
- RestFul APIs Integration
- C, C++, HTML, CSS

Soft Skills

- Stakeholder Management
- Requirement Gathering
- Problem Solving
- Team Collaboration
- Technical Leadership
- End-User Training
- Process Improvement

- Managed activities related to the **ETQ System Request** module by reviewing enhancement requests, analysing business impact, estimating effort, and implementing approved solutions.
- Reviewed Project Request forms to identify requests for new functionality, enhancements, and process improvements.
- Monitored System Request due dates and proactively communicated project progress and delivery status to business stakeholders.
- Led ETQ development activities and successfully delivered multiple enhancement projects within defined timelines.
- Conducted requirement gathering sessions, stakeholder meetings, design discussions, and technical workshops to understand business needs and propose effective solutions.
- Collaborated with cross-functional teams, including Quality Assurance, Manufacturing, Engineering, Compliance, Validation, IT Infrastructure, Database Administration, SAP, and Business users.
- Acted as the primary technical point of contact for ETQ-related issues, enhancements, and production support activities.
- Planned, coordinated, and executed ETQ application promotions across **Development, QA, UAT, and Production** environments following organisational change management processes.
- Managed deployment activities, including migration package preparation, code promotion, configuration migration, post-deployment validation, and rollback planning.
- Coordinated with Release Management and Infrastructure teams during production deployments, system upgrades, server maintenance, and environment refresh activities.
- Participated in Go-Live activities and provided hypercare support to ensure successful production implementation with minimal business disruption.
- Performed pre-deployment and post-deployment validation to ensure application stability, data integrity, and successful release execution.
- Applied Change Management and SDLC best practices throughout the software development lifecycle to ensure controlled and compliant deployments.
- Regularly monitored ETQ environments and ensured timely installation of application patches, hotfixes, and software upgrades.
- Worked closely with Quality Assurance teams during **Unit Testing (UT), System Integration Testing (SIT), and User Acceptance Testing (UAT)** to validate new features and enhancements.
- Performed root cause analysis, investigated production issues, and implemented permanent corrective actions to improve system reliability.
- Provided ongoing production support and troubleshooting to ensure optimal performance and availability of ETQ Reliance applications.

Education

Bachelor's Degree in Information Technology

Hasmukh Goswami College of Engineering, Ahmedabad

08/2018 – 08/2022 | Ahmedabad

- Bachelor's degree in Information Technology from a reputed university, with a focus on software development, networking, and cybersecurity. Completed courses in programming languages such as Java, C++, and Python, gaining practical experience through hands-on projects and internships.
- Developed a strong foundation in database management, systems analysis, and web development through coursework in SQL, data structures, and HTML/CSS. Demonstrated proficiency in designing and implementing secure and user-friendly applications, websites, and databases.
- Participated in extracurricular activities such as coding competitions, hackathons, and IT clubs to expand knowledge and skills in cutting-edge technologies. Collaborated with peers on team projects to solve complex technical challenges and deliver innovative solutions.
- Utilized industry-standard tools and software to enhance technical proficiency, including Visual Studio, Wireshark, and virtualization platforms like VMware and VirtualBox. Engaged in independent research and self-study to stay updated on the latest trends in information technology and sharpen problem-solving abilities.
- Planning to pursue advanced certifications in areas such as cloud computing, machine learning, and network security to further specialize in a specific IT domain. Eager to leverage academic knowledge and practical experience in a professional setting to drive innovation, optimize processes, and contribute to the success of organizations in the technology sector.

- Identified opportunities for automation, process optimisation, and continuous improvement to enhance system functionality and user experience.
- Conducted regular stakeholder meetings to review project progress, discuss business priorities, resolve technical challenges, and communicate project risks and milestones.
- Presented technical solutions, implementation strategies, effort estimates, and project timelines to business stakeholders and management.
- Worked closely with project managers during sprint planning, backlog refinement, release planning, effort estimation, and resource allocation.
- Collaborated with global and offshore development teams to deliver ETQ enhancements across multiple business regions.
- Developed and maintained comprehensive technical documentation, including workflow documentation, configuration guides, deployment documents, release notes, user manuals, SOPs, and knowledge base articles.
- Delivered end-user training sessions and knowledge transfer workshops to improve system adoption and operational efficiency.
- Supported internal and external audits by providing ETQ configuration documentation, validation evidence, deployment records, and compliance documentation.
- Ensured adherence to organisational standards, quality procedures, validation requirements, and software development best practices.
- Demonstrated strong expertise in stakeholder management, requirement gathering, technical leadership, problem-solving, production support, release management, and continuous process improvement.

Technical Skills

ETQ Reliance: Workflows, Forms, Views, ETQScript, Connection Profiles, Database Sources, System Requests, Notifications, Reports, Dashboards, Security Management, System Administration, Configuration, Customization

Programming & Scripting: Python, ETQScript, SQL, MySQL, RESTful APIs, JSON, XML

Database: MySQL, SQL Server, Stored Procedures, Query Optimization, Data Validation, Performance Tuning

Integration: REST APIs, SAP Integration, Third-Party System Integration, Data Migration, Web Services

Reporting & Analytics: Power BI, SQL Reporting, KPI Dashboards, Data Analytics

Methodologies: SDLC, Agile, Scrum, Change Management, Release Management, UAT, SIT, Production Support, Root Cause Analysis, Version Control

Certifications

ETQ Reliance Basic Designer

(ETQ) | January 2025

ETQ Reliance Administrator Certification Training

(ETQ) | January 2025

ETQ Validation Certification

(ETQ) | July 2025

Application Walkthrough: Safety Management

(ETQ) | August 2025

Reliance Designer - Intro to ETQ Script, Part 1

(ETQ) | September 2025

Octave Product Focus NXG MythBusters

(ETQ) | June 2026

Soft Skills: Stakeholder Management, Requirement Gathering, Technical Leadership, Cross-Functional Collaboration, Technical Documentation, End-User Training, Problem Solving, Process Improvement, Project Coordination

Kernshell Technologies PVT LTD

ETQ Developer

06/2022 – 01/2025 | Ahmedabad, Gujarat

- Performed testing and validation of software applications to ensure quality and reliability.
- Documented and reported software defects, tracking them to resolution.
- Participated in the development of testing procedures and protocols.
- Assisted in the implementation of quality assurance processes and best practices.
- Design and Develop Software Applications on the ETQ Reliance platform based on business requirement while working with Agile team.
- Configure or Customize the ETQ Reliance system to meet business needs.
- Conduct Unit testing to ensure software quality and performance.
- Proven track record of successfully implementing and maintaining ETQ software solutions.
- Known for being a quick learner, excellent communicator, and reliable team player.
- Analyzed and interpreted user requirements to customize software solutions for optimal performance.

Way to Web PVT LTD

Django Developer

01/2022 – 05/2022 | Ahmedabad, Gujarat

- Had an Internship program and learned the Django coding along with the python and created a project. Inventory Management System.
- Developed and maintained scalable web applications using Django framework to meet client requirements
- Designed database schema, models, and RESTful APIs for seamless integration with front-end technologies
- Implemented security features to protect sensitive data and prevent common web vulnerabilities
- Collaborated with cross-functional teams to troubleshoot technical issues and optimize application performance

Interests

- Continuous learning and keeping up-to-date with latest trends in quality management software
- Problem-solving and troubleshooting to optimize system performance
